O. J. Aldraihem and **A. A. Khdeir**	1	Exact deflection solutions of beams with shear piezoelectric actuators
A. A. Pisano and **P. Fuschi**	13	Closed form solution for a nonlocal elastic bar in tension
W. M. Sebastian	25	Nonlinear proportionality of shear-bond stress to shear force in partially plastic regions of asymmetric FRC-laminated steel members
V. A. Buryachenko, N. J. Pagano, R. Y. Kim and **J. E. Spowart**	47	Quantitative description and numerical simulation of random microstructures of composites and their effective elastic moduli
E. Jacquelin and **P. Hamelin**	73	Force recovered from three recorded strains
X. Zhao	89	The stress intensity factor history for an advancing crack in a transversely isotropic solid under 3-D loading
H. J. Ding, H. M. Wang and **P. F. Hou**	105	The transient responses of piezoelectric hollow cylinders for axisymmetric plane strain problems
D. H. Timm, B. B. Guzina and **V. R. Voller**	125	Prediction of thermal crack spacing
J. F. Peters and **E. Heymsfield**	143	Application of the 2-D constant strain assumption to FEM elements consisting of an arbitrary number of nodes
X. Zhao, K. M. Liew and **T. Y. Ng**	161	Vibration analysis of laminated composite cylindrical panels via a meshfree approach
D. D. Milašinović	181	Rheological–dynamical analogy: modeling of fatigue behavior
P. H. Wen, M. H. Aliabadi and **A. Young**	219	Fracture mechanics analysis of curved stiffened panels using BEM
V. I. Gulyayev, P. Z. Lugovyy and **G. M. Ivanchenko**	237	Discontinuous wave fronts propagation in anisotropic layered media
		Erratum
T. Meurer, J. Qu and **L. J. Jacobs**	249	Erratum to "Wave propagation in nonlinear and hysteretic media—a numerical study" [International Journal of Solids and Structures 39 (2002) 5585–5614]
	I	Plasticity 2003
	IV	Keywords

NUMBER 2

C.-S. Liu	251	Symmetry groups and the pseudo-Riemann space-times for mixed-hardening elastoplasticity
G. M. Loughran, T. W. Shield and **P. H. Leo**	271	Fracture of shape memory CuAlNi single crystals
A. Gentile and **A. Messina**	295	On the continuous wavelet transforms applied to discrete vibrational data for detecting open cracks in damaged beams
M. Lembo	317	On the stability of elastic annular rods
F. G. Yuan, S. Yang and **B. Yang**	331	Three-dimensional Green's functions for composite laminates
Q. M. Li and **H. Meng**	343	About the dynamic strength enhancement of concrete-like materials in a split Hopkinson pressure bar test
N. Fakri, L. Azrar and **L. El Bakkali**	361	Electroelastic behavior modeling of piezoelectric composite materials containing spatially oriented reinforcements
S. Papargyri-Beskou, K. G. Tsepoura, D. Polyzos and **D. E. Beskos**	385	Bending and stability analysis of gradient elastic beams
J. Schröder and **P. Neff**	401	Invariant formulation of hyperelastic transverse isotropy based on polyconvex free energy functions
X.-Q. Feng, J.-Y. Li and **S.-W. Yu**	447	A simple method for calculating interaction of numerous microcracks and its applications
J. F. Wang, C. C. Lin and **B. L. Chen**	465	Vibration suppression for high-speed railway bridges using tuned mass dampers
H. W. Zhang and **W. X. Zhong**	493	Hamiltonian principle based stress singularity analysis near crack corners of multi-material junctions

NUMBER 3

N. P. Kruyt	511	Statics and kinematics of discrete Cosserat-type granular materials
G. Potzta and **L. P. Kollár**	535	Analysis of building structures by replacement sandwich beams
T. E. Tay, V. B. C. Tan and **M. Deng**	555	Element-failure concepts for dynamic fracture and delamination in low-velocity impact of composites
J. H. Yang and **K. Y. Lee**	573	Penny shaped crack in a piezoelectric cylinder surrounded by an elastic medium subjected to combined in-plane mechanical and electrical loads

H. Chai 591 Fracture mechanics analysis of thin coatings under plane-strain indentation

W. H. Warner 611 The maximum potential energy of elastic rods under axial gravitational load

S. Heo, J. H. Kim and **Y. Y. Kim** 633 Significance of distortion in thin-walled closed beam section design

X. Zhang, Q.-H. Qin and **Y.-W. Mai** 649 Asymptotic fields for dynamic crack growth in non-associative pressure sensitive materials

J. A. Teixeira de Freitas and **C. Cismaşiu** 671 Hybrid-Trefftz displacement element for spectral analysis of bounded and unbounded media

Y. Haitian and **L. Yan** 701 A combined approach of EFGM and precise algorithm in time domain solving viscoelasticity problems

M. Kekana, P. Tabakov and **M. Walker** 715 A shape control model for piezo-elastic structures based on divergence free electric displacement

P. Decuzzi and **G. P. Demelio** 729 Stress-driven morphological instability and catastrophic failure of microdevices

Z.-G. Zhou, B. Wang and **Y.-G. Sun** 747 Investigation of the dynamic behavior of two parallel symmetric cracks in piezoelectric materials use of nonlocal theory

III Keywords list

VI FraMCoS-5

NUMBER 4

H. Fan and **G. F. Wang** 763 Interaction between a screw dislocation and viscoelastic interfaces

J. A. Crossley, A. J. M. Spencer and **A. H. England** 777 Analytical solutions for bending and flexure of helically reinforced cylinders

M. Ciavarella and **G. Macina** 807 A note on the crack analogue model for fretting fatigue

D. Helm and **P. Haupt** 827 Shape memory behaviour: modelling within continuum thermomechanics

S. Maghous and **G. J. Creus** 851 Periodic homogenization in thermoviscoelasticity: case of multilayered media with ageing

T. W. Wright 871 On the speed of an unconstrained shear band in a perfectly plastic material

X. Wang and **Z. Zhong** 881 A circular inclusion with a nonuniform interphase layer in anti-plane shear

G. Lykotrafitis and **H. G. Georgiadis** 899 The three-dimensional steady-state thermo-elastodynamic problem of moving sources over a half space

L. B. Zuev, B. S. Semukhin and **N. V. Zarikovskaya** 941 Deformation localization and ultrasonic wave propagation rate in tensile Al as a function of grain size

S. Reese 951 Meso-macro modelling of fibre-reinforced rubber-like composites exhibiting large elastoplastic deformation

X.-L. Gao, K. Li and **S. Mall** 981 A mechanics-of-materials model for predicting Young's modulus of damaged woven fabric composites involving three damage modes

A. R. Hadjesfandiari and **G. F. Dargush** 1001 Boundary eigensolutions in elasticity II. Application to computational mechanics

Correspondence

E. Radi, D. Bigoni and **D. Capuani** 1033 Response to: Comments on "E. Radi, D. Bigoni and D. Capuani, Effects of pre-stress on crack-tip fields in elastic, incompressible solids" [International Journal of Solids and Structures 39 (2002) 3971–3996]
